

CEN4010 Principles of Software Engineering

Spring 2021

Team 5

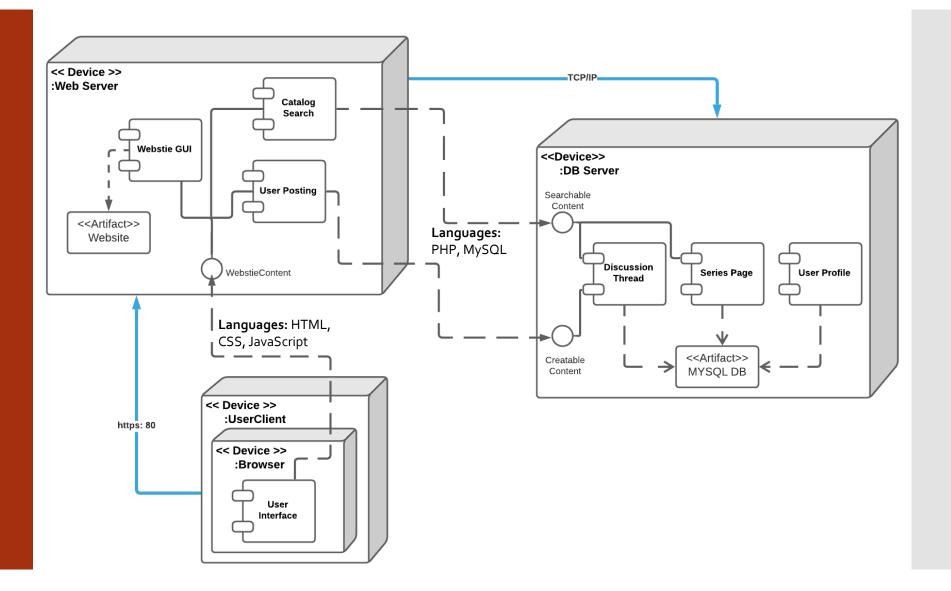

### The Team at Chatflix

- Verneshia Persaud
   Scrum Master, Technical Writer, Frontend Developer
- Jason Abdool Backend Developer
- Viviana Joubert Frontend Developer
- Maksym Mostovyy
   Product Owner, Lead backend Developer
- Monica Silvestri
   GitHub Master, Lead Frontend Developer, Full-Stack Developer

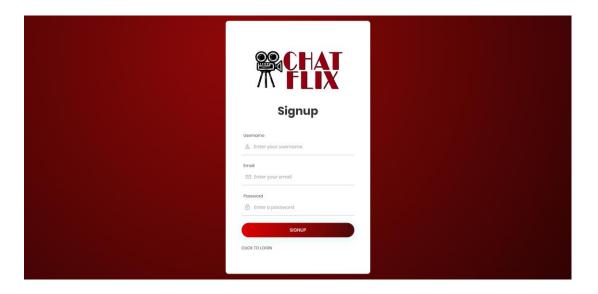

# Motivation and Target Audience

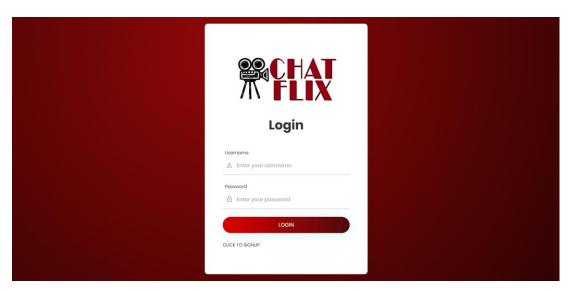

• Chatflix is a social network which aims to replace media giants like IMBD and Rotten Tomatoes with its simplistic design. It is a virtual community of pop culture fanatics and binge watchers can chat with fellow enthusiasts about the TV series or major motion picture they have recently watched.

## System Implementation Architecture

### Sign Up and Log in

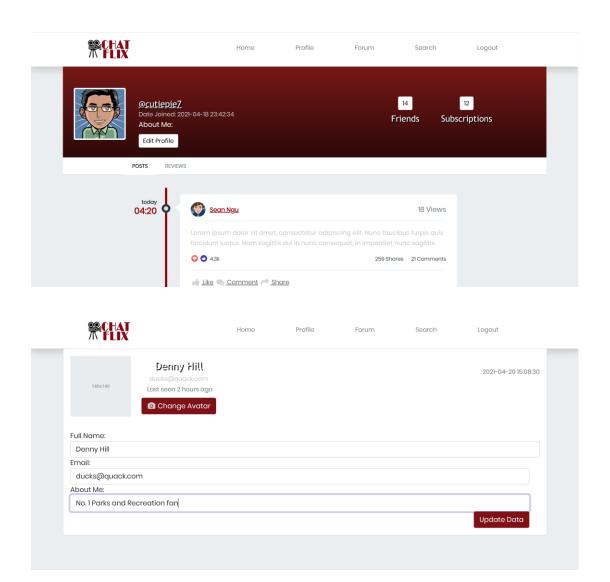

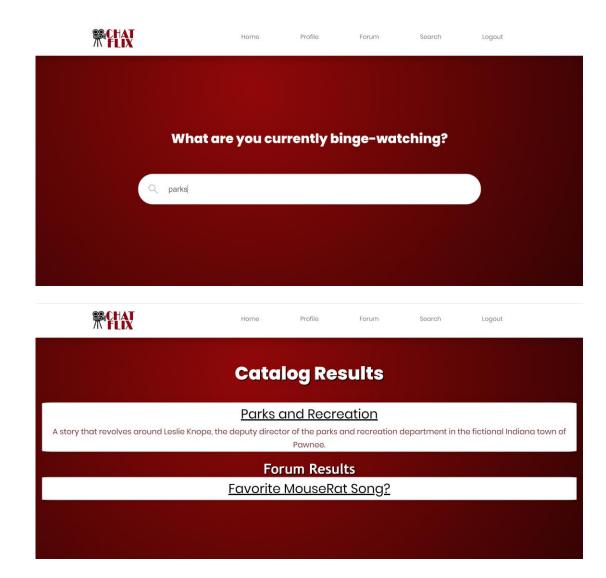

### Home Page

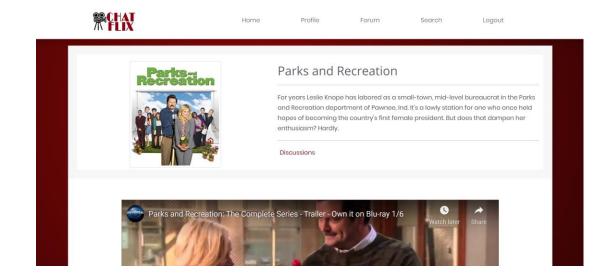

### View and Edit your Profile

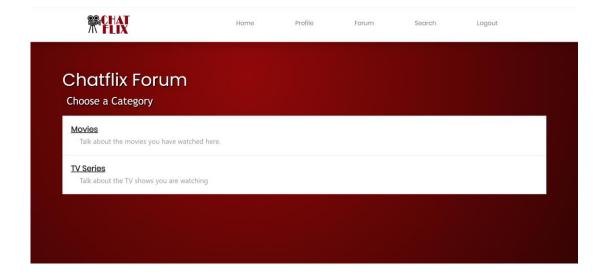

#### Search and Search Results

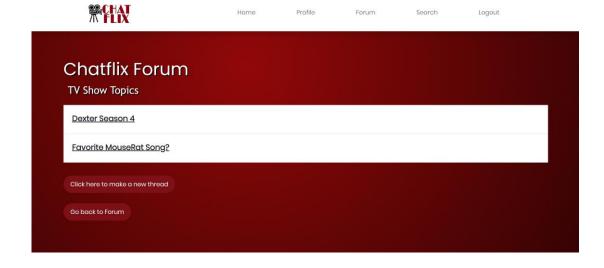

#### Series or Movie Information

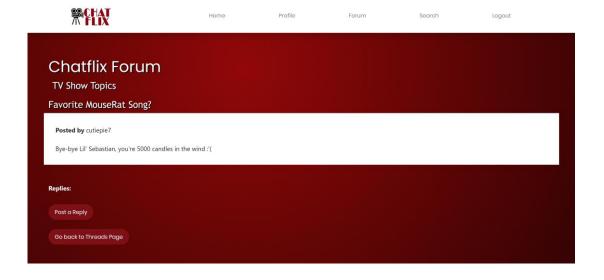

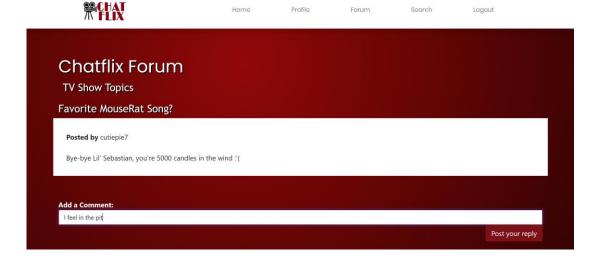

### Chatflix Forum and Threads

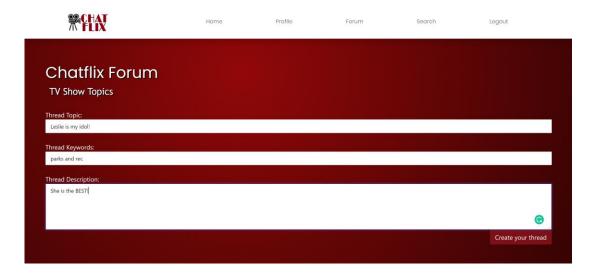

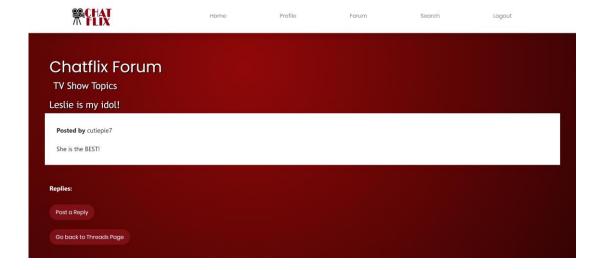

### View and Post a Reply to a Thread

#### Create a New Thread

### Non-Functional Requirements

The system's home page supporting 3000 users per hour must provide		
a response time of 3 seconds or less.		
Interactions with the navigation bar should take one second or less.		
Searching the catalog must take one second or less.		
Capacity and Scalability		
The system must store data effectively, and storage must increase as		
the system gets used more often.		
The system must be able to process 1000 queries per minute.		
Availability		
The system must be available 91% during the month.		
Maintainability		
Latest standards and designs must be used for the system's base		
architecture. Common coding styles must be used.		
The system must implement modular programming.		
Recovery		
The system must backup data every hour. Backup must take one		
minute or less.		
Security and Privacy		
The system must use encryption to store data securely.		
Users must be logged in to see posts and profiles.		
Mobility		
The system must support the following browsers:		
Chrome		
Safari		
Firefox		

### Completed Features

- Registration and Log In with
   Password Encryption
- Customizable User Profile
- Search Catalog
- Discussion Forum

#### Future Features

- Add Friends/Friends list
- View another User's Profile Page
- Home Page Activity Feed
- Customizable Profile Theme (i.e., avatar, color scheme)
- Rate a Series or Movie
- Subscribe to a Forum or Thread
- Like or Dislike a Post

These features could not be implemented due to time allotted for project and number of available resources.

# Lessons Learned and Knowledge Gained

Incident/Risk	Lesson Learned
Too many features to implement in a limited time frame.	Prioritize the features and implement a few of the most important features.
Poor quality of vertical prototype.	Increase estimation time for development.
Missed deadline for Beta launch.	Allot more time for testing and deployment.
Key staff is unavailable at critical times.	Develop contingency plans in case staff is unavailable. Create tasks which have less dependency on other team member's tasks.

#### Thank you

 Thank you to Dr. Shihong Huang and TA Nataliia Neshenko for their support and guidance through the development of this project.
